### Qualifications

B.Eng (Civil), B.Bus (Business Administration),

Graduate Certificate in Geomechanics WASM

### Membership and Affiliations

Member of the Institution of Engineers Australia

### Professional Experience

10 years specialising in Project Management and Engineering

### Profile

Anna is a qualified Civil Engineer with 10 years experience in engineering roles in Australia and overseas. She has a proven track record of project leadership, problem solving and effective delivery of concurrent projects. Anna also holds a Bachelor of Business qualification and has the ability to apply a combination of technical engineering and management skill to deliver projects.

At Indesco Anna has filled the role of senior engineer and project manager for land release and civil works projects. Her experience extends across a range of disciplines which affords her the flexibility to integrate quickly into project teams. Anna is acutely aware of the role that stakeholder management plays in successful project delivery and has demonstrated an ability to effectively engage key stakeholders throughout her projects.

Over the last 18 months Anna has also been crucial to the delivery of the ACT Government's update of Design Standards and technical specifications for urban infrastructure works. Anna's in depth understanding of technical standards coupled with her expertise in project management has ensured that this complex project is being delivered confidently and competently.

### Key areas of expertise

- Project Management;
- Land Development;
- Infrastructure Design;
- Risk Management, Safety in Design;
- Cost and Quality Control;
- Stakeholder Management;
- Technical Standards and Specifications.

## Land Development

### Taylor 1 Residential Estate

Senior Engineer for 545 lot residential development. The project is managed by the Land Development Agency. The Indesco team completed the EDP submission within a remarkable time frame and are on schedule to receive DA approval early in 2016. Indesco was subsequently engaged for the construction, supervision and contract administration of the estate in two stages.

### Gunghalin Town Centre

Senior Engineer for town centre development. the project is located to the east of the existing Gunghalin Town Centre. The project is managed by the Land Development Agency.

### Moncrieff East Residential Estate

Senior Engineer for the planning and design of the Moncrieff East Residential Estate. The estate comprises of 1,200 dwellings. The project was a greenfields development implemented by the Land Development Agency, ACT.

## Infrastructure Projects

### Sewer Infrastructure Project, Kingston Foreshore

Project Manager for the design and documentation of the relocation of sewer vent and infrastructure at the Kingston Foreshore development. The role required coordination of a large, multidisciplinary consultant team. It further requires extensive stakeholder management with agencies and authorities.

### Site Investigations, Analysis and Design

Coordination of engineering investigation, analysis and design of land packages identified under the LDA land release programme. Preparation of investigation reports and infrastructure designs to ensure servicing of the sites as part of the sales preparation process.

## Project Management

### ACT Standards & Specifications Review

Delivery of the programme to review and revise the ACT design standards and technical specifications for infrastructure. The role requires not only the technical documentation but also the coordination of stakeholders and communication of agreed outcomes.

### Various projects, Jakarta, Indonesia

Project management and coordination of project documentation for mining and construction projects across South East Asia. Management of multiple, concurrent projects including feasibility studies, due diligence reports, and project valuations.

### Engineering Manager

Manager of mining engineering and surveying teams. Management of short term production schedules, budgets and operational reporting.

### Construction Project Manager

Construction Project Manager/Superintendent for the coordination and delivery of mining construction contracts by approximately 100 contractors. Service delivery with an annual budget of \$30m which included road maintenance, shotcrete, mining construction and underground drilling.

## Senior Contract Engineer

As Senior Contract Engineer, Anna provided cost analysis, progress claim reviews, budget and tender preparation and contract administration functions for mining construction contracts. The scope of services provided included technical investigations of new products, preparation of tender documents and tender reviews for infrastructure works. The construction packages included civil works, concrete construction works and road maintenance contracts with an annual budget of \$100m.
